

Protec Algo-Tec™ 6100 Interactive Digital Addressable Fire Control System

Protec Fire Detection plc

Protec Algo-Tec™ 6100

**INTERACTIVE DIGITAL ADDRESSABLE
FIRE CONTROL SYSTEM**

- **Cost Effective Single Loop Panel**
- **High Capacity Loop - 192 Addresses**
- **Algo-Tec™ 6000PLUS Protocol**
- **Surface and Recessed Mounting**
- **Easy to Install**
- **Reduced False Alarms**
- **Enhanced Performance**
- **On Site Flexibility**
- **Designed to EN 54-2 & 4**
- **Open Protocol**

System Features

The Protec Algo-Tec™ 6100 is an interactive digital addressable fire detection and alarm system ideally suited for small and medium sized buildings such as shops, hotels and offices. The control panel is designed and manufactured by Protec to comply with EN 54-2 & 4. The control panel is suitable for surface or recessed mounting with a moulded polycarbonate enclosure finished in storm grey.

Loop

The 6100 control panel is equipped with a high capacity Algo-Tec™ digital addressable data loop, with up to 192 addresses. In addition to the Algo-Tec™ 6000PLUS sensors, interfaces and manual call points the loop can also support loop powered SOUNDERS, BEACONS and OPTICAL BEAM DETECTORS. Additionally a 6300 Loop Powered Repeat Display can be connected directly to this loop, resulting in reduced cabling requirements, simplified installation and associated cost savings.

Alarms

In addition to loop powered sounders and beacons, 2 fully monitored alarm outputs are provided at the panel for alternative wiring arrangements.

Auxiliary Contacts

One set of global fire, and one set of fault changeover contacts.

Controls and Display

All the functions of the modern styled Control Panel are accessed by entering the user access code. The controls are SILENCE, SOUND ALARMS, RESET and ACCEPT plus navigation push buttons to enable access to the user menu facilities. The control panel display consists of a 4x20 character liquid crystal display, twin common fire LED indicators, 16 separate zonal fire LED's, power on, pre-alarm, system fault, common fault, test and disablement LEDs.

Liquid Crystal Display

The 80 character liquid crystal display will under normal quiescent conditions display the current date and time with the option to also display a 40-character user's message such as site name.

In an alarm or fault condition the LCD will display the device, address and zone number and up to 20 characters of user definable location text, programmable on site using Protec 6100 windows based software.

Device Location Text

Windows based text software is supplied free of charge to our clients to enable you to enter the location text on to the disk supplied and hand to our commissioning engineer for loading into the panel during commissioning. This simple process allows you more flexibility enabling you to make any last minute changes and speed up the entire process.

Power Supply

The 6100 control panel is supplied with an integral 1A dc switch mode charger and accommodates two 12V 3.3 Ah sealed lead acid battery.

On Site Programming

The Protec Algo-Tec™ 6100 system is on site programmable. All of the commissioning configuration data can be entered and/or backed up using the Protec 6100 windows based programming software via a PC. This feature enables the system to be re-configured and checked prior to attending site simplifying commissioning works on site, enabling text amendments to be carried out whilst on site and providing an invaluable remote backup should the need arise.

Loop Devices

The Protec Algo-Tec™ 6000PLUS protocol utilises FAST™ addressing (Firmware Addressed Secure Technology). Every FAST™ device is manufactured with a unique serial number.

FAST™ addressing ELIMINATES troublesome and time consuming address cards and DIL switching whilst being far more secure than "soft addressing".

The Protec Algo-Tec™ 6000PLUS sensor range has been developed to incorporate advanced fire sensing technology, electronic sounders, high intensity LED warning beacons and speech enhanced talking sounder capability, all integrated within the sensor head and powered from the loop.

Typical Sensor Variants

6000PLUS/OPHT/S = c/w Sounder

6000PLUS/OPHT/L = c/w LED Beacon

6000PLUS/OPHT/SL = c/w Sounder and LED Beacon

6000PLUS/OPHT/TS = c/w Talking Sounder

6000PLUS/OPHT/TSL = c/w Talking Sounder and LED Beacon

6000PLUS/HT

FAST™ Interactive Heat Sensor - Interactive addressable heat sensor with low thermal mass thermistor, giving fast response to temperature increases. Other Heat Sensor variants include: 6000PLUS/HT/S, 6000PLUS/HT/SL, 6000PLUS/HT/TSL

6000PLUS/OP

FAST™ Interactive Optical Smoke Sensor - Interactive addressable high performance optical smoke sensor provide efficient reliable detection using the light scatter sensing principle with rapid response to a fire signal. Other Optical Sensor variants include: 6000PLUS/OP/S

6000PLUS/OPHT

FAST™ Interactive Optical Heat Sensor - Interactive addressable high performance optical smoke and heat multi-sensor. Other Optical Heat Sensor variants include: 6000PLUS/OPHT/S, 6000PLUS/OPHT/L, 6000PLUS/OPHT/SL, 6000PLUS/OPHT/TS, 6000PLUS/OPHT/TSL

6000PLUS/OPHTCO

FAST™ Interactive Optical Heat CO Sensor - Interactive addressable high performance optical smoke heat and carbon monoxide multi-sensor. Other Optical Heat CO Sensor variants include: 6000PLUS/OPHTCO/S, 6000PLUS/OPHTCO/L, 6000PLUS/OPHTCO/SL, 6000PLUS/OPHTCO/TSL

6000PLUS/BASE

Low Profile Common Mounting Base - Compatible with the above range of Algo-Tec™ 6000PLUS Sensors.

6000PLUS/FFBASE

Fast Fixed Base - Fast fixed recessed base is designed to recess the sensor into a false ceiling to give a lower profile view of the sensor.

6300/LOOP/LCD Repeater

- Connected directly to the local data loop and takes up just one address. The 1 x 40 character LCD Display provides clear text location of fire and fault events.

6000/MCP

FAST™ Addressable Manual Call Point - Key operated test facility, a loop short circuit isolator is incorporated.

The conductor size required as follows

- 1.0mm² Conductor required
- 1.5mm² Conductor required
- 2.5mm² Conductor required

MAXIMUM LOOP RESISTANCE 16 OHMS PER CONDUCTOR

Table detailing the loop standby and alarm load for typical Algo-tec™ 6000PLUS devices.

Product	Description	Number of Addresses	Loop Standby Load mA	Loop Alarm Load mA
6000/MCP	Manual Call Point	1	0.5	3.4
6000/FIREBEAM	Loop Beam	1	3.65	7
6000PLUS/HT	Heat Sensor	1	0.2	0.2
6000PLUS/HT/S	Heat Sensor c/w Sounder	1	0.4	5.4
6000PLUS/OPHT	Optical Smoke and Heat Sensor	1	0.2	0.2
6000PLUS/OPHT/S	Optical Smoke and Heat Sensor c/w Sounder	1	0.4	5.4
6000PLUS/OPHT/SL	Optical Smoke and Heat Sensor c/w Sounder and Beacon	1	0.4	10.4
6000PLUS/OPHT/TSL	Optical Smoke and Heat Sensor c/w Talking Sounder and Beacon	1	0.4	13.4
6000PLUS/OPHTCO	Optical Smoke, Heat, and CO Sensor	1	0.45	0.45
6000PLUS/OPHTCO/S	Optical Smoke, Heat, and CO Sensor c/w Sounder	1	0.45	5.45
6000/LED	Loop Beacon	1	0.5	5.5
6000/SSR	Loop Sounder	1	0.7	5.7
6000/SSR/LED	Loop Sounder Beacon	1	0.7	10.7
6000/ZAI*	Zone Alarm Interface	1	2	4
6000/MICCO	Monitored Input CC Output	1	0.55	5

Note: The following Loop Parameters should be observed

- The total number of addressable devices should not exceed 192 per loop.
- Add 20mA to total loop alarm load to allow for fire indicator LED's on devices
- The total loop alarm load should not exceed 600mA per loop.

* Auxiliary 24V dc supply required.

6000PLUS/UG4DP

Ventilation Duct Smoke Sensor Assembly - Single pipe air sampling unit for air speeds from 0.5 to 20m per sec. supplied with 6000PLUS/BASE suitable for use with 6000PLUS/OP FAST™ interactive optical smoke sensor.

6000/FIREBEAM

FAST™ Addressable Loop Powered Beam Detector - Combined transmitter/receiver unit and separate low level controller. With a beam range of 5-100 metres.

6000/LED

FAST™ Addressable Loop Powered High Intensity Flashing Beacon - The 6000/LED has 18 high intensity LEDs, and due to the low current design, is addressable and loop powered, utilising the Protec Algo-Tec™ 6000 Protocol.

6000/SSR

FAST™ Addressable Loop Powered High Output Electronic Sounder - utilises a Piezo driver unit to enable high sound output and very low current consumption.

6000/SSR/LED

FAST™ Addressable Loop Powered High Output Electronic Sounder with LED Beacon - a low current loop powered addressable device. With typical sound output of 100dB(A) at 1m, the tone and volume options are selectable by the control panel.

6000PLUS/TSR2

FAST™ Addressable Loop Powered Talking Sounder - The 6000PLUS/TSR2 voice enhanced talking sounder is available with seven voice messages plus 'bell' sound in addition to the three fire alarm tones compatible with the Protec range of electronic sounders.

6000PLUS/TSR2/LED

FAST™ Addressable Loop Powered Talking Sounder with LED Beacon - the Protec Algo-Tec™ 6000PLUS/TSR2/LED is equipped with an integrated voice enhanced sounder and high intensity flashing beacon array.

6000/FIU

Flush Mounted Short Circuit Isolator Unit - To isolate a short circuit fault on either the incoming or outgoing loop cables. Suitable for a 30mm deep electrical mounting box.

6000/LPZA

isolator is included.

FAST™ Addressable Flush Mounted Loop Powered Zone Alarm Interface Unit - With a monitored detection circuit suitable for use with Protec 3000 series detection devices. Line continuity maintained. Monitored alarm output circuit rated at 24V dc 50mA max. Suitable for a 45mm deep electrical mounting box. A loop short circuit isolator is included.

6000/ZAI

FAST™ Addressable Flush Mounted Zone Alarm Interface Unit - With a monitored detection circuit suitable for use with Protec 3000 series detection devices. Line continuity maintained. Monitored alarm output circuit rated at 24V dc 1A max. Suitable for a 45mm deep electrical mounting box. A loop short circuit isolator is included.

6000/MICCO

A link can be cut to provide a 7-second delay to the input. Suitable for a 45mm deep electrical mounting box. A loop short circuit isolator is incorporated.

FAST™ Addressable Flush Mounted Loop Powered Monitored Input, Clean Contact Output Interface Unit - With a monitored input circuit suitable for use with simple switch devices and the output is a clean changeover contact 5A rated at 240V ac. A link can be cut to provide a 7-second delay to the input. Suitable for a 45mm deep electrical mounting box. A loop short circuit isolator is incorporated.

Multi-way Input/Output Interfaces - A range of 16 way input/output interfaces are available with monitored alarm outputs or clean changeover contacts. All interfaces are FAST™ addressable.

Algo-Tec™ 6000PLUS Interactive Decision Making Algorithms - Typical Applications

NOTE: The above examples give an indication of system reaction to intermittent contaminants and typical fire sources in a correctly designed BS5839 system. They by no means detail the full complexity of the systems decision making algorithms. Examples are for 6000PLUS/OPHT.

The Protec Algo-Tec™ 6100 Interactive Digital Addressable System unwrapped:

The Protec Algo-Tec™ 6000PLUS protocol developed by Protec's in-house Research and Development team is utilised by the Protec Algo-Tec™ 6100 interactive digital addressable fire control systems. Immunity to false alarms, more responsive fire detection, and ease of use has all been achieved to develop one of the most reliable systems available.

Protec Algo-Tec™ 6000PLUS

The name Algo-Tec™ is a derivative of Protec algorithms. Algorithms are logical mathematical procedures for solving problems. Protec have developed fire detection algorithms coupled with fuzzy logic specifically designed to reduce unwanted fire alarms and to enhance the sensitivity of the system to true fire phenomenon. The Algo-Tec™ algorithms are exclusively utilised by the Protec Algo-Tec™ 6400, 6300 and 6100 Interactive Digital Addressable Fire Control Systems.

Interactive

Algo-Tec™ evaluates the data of each fire sensor and is able to learn from the information received. This may simply be to recognise that a sensor is becoming contaminated or in a dirty environment and to automatically increase the alarm threshold to compensate for the background levels (Threshold Compensation).

More complex Algo-Tec™ functions include the ability to discriminate between certain fire and non-fire conditions, filtering out certain environmental stimuli, and increasing the sensitivity of a sensor when an increase in temperature is detected.

The net effect of the interaction between the sensors and the Algo-Tec™ decision making is enhanced performance, through immunity to false alarms and more responsive fire detection.

Digital Addressable

The data communication between the sensors and the control equipment is Digital.

The Algo-Tec™ protocol utilised by the 6000PLUS system enables high levels of data to be transferred, providing far more detailed information than was previously achievable with analogue addressable systems. It should however be noted that many analogue addressable systems use digital communication but do not transfer the high levels of data associated with the Algo-Tec™ protocol. Speed, stability, excellent EMC and security all serve to enhance the Algo-Tec™ Digital signalling. Why go analogue addressable when you can now choose Algo-Tec™ Digital Addressable.

**6300 Loop LCD Display**

The 6300/LOOP/LCD can be connected directly to the local Algo-Tec™ digital addressable data loop and takes up just one address. The facia displays power, fire, fault, disablement and more alarms.

Fire and fault events are displayed on the 2 x 40 character LCD display and automatically scroll. A backlight ensures that the events can be read in all lighting situations. Fire events have highest priority and inhibit the display of fault events. A new event initiates the internal buzzer and a mute button allows the internal buzzer to be muted.

Loop standby/Alarm load 60mA.

Complies with EN54-2 & 4

6100 - Single Loop.

Mains 85 - 264V ac (50-60Hz).
21.5 - 30V dc.
0 - 40°C.
85% Non-condensing.
22mA.
56mA (plus 7mA if fire link module used).

Backlit liquid crystal display 4 lines of 20 characters.
1 loop, with 192 address capacity. Algo-Tec™ 6000PLUS Protocol.
600mA including all loop connected devices.
31 Zones, 16 with LED indication, plus general fire indicator.
1A dc switch mode, temperature compensated.
2 x 12V 3.3Ah Sealed Lead Acid.
2 monitored conventional sounder circuits (100mA per output maximum).
1 set of non-monitored changeover contacts (1A @ 24V dc)
Up to 192 alarm outputs with additional loop output devices.
600mA loop, 100mA per conventional alarm output.
Fully fault monitored to EN 54-2 & 4.
Single pole changeover contacts (1A rated @ 24V dc).
24V dc fused at 150mA.
24V dc fully monitored output (requires end of line module SF4165759).
USB (Type A male to Type B male connection lead required).
228(W) x 345(H) x 111(D).
1.5kg (excluding batteries).
EN 54-2 : 1997 + A1 : 2006.
EN 54-4 : 1998 + A1 + A2.
EN 54-13:2005.

First 31 groups are available for detection zones, group 32 is reserved for Sound Alarms push button.
Each output group can have a delay programmed (5 seconds to 10 minutes).
Each output group can be set as Alarm or Control output.
Up to 32 loop addresses may be programmed to be non-latching.
To EN 54-2 Type C dependency.
Each detector may have one of two sensitivities programmed.
Each loop sounder may be programmed to be low, medium or high volume.
The panel may be programmed into two time zones to run different sensitivities for each detector.
The sounder on and off times may be programmed from 0.5 sec to 128 sec in 0.5 second increments.
1 sec to 120 sec in 1 second increments.
5 seconds to 10 minutes in 5 second increments.
1 sec to 255 sec in 1 second increments.
Proprietary software suite designed specifically for the 6100.
Allows text editing, matrix configuration, setup of all panel parameters.

2 lines of 20 character panel text. Displayed when the system is 'normal'.
20 characters of device address text.
20 characters of zone text.

The 6100 will support multiple languages.
