with innovative LED technology

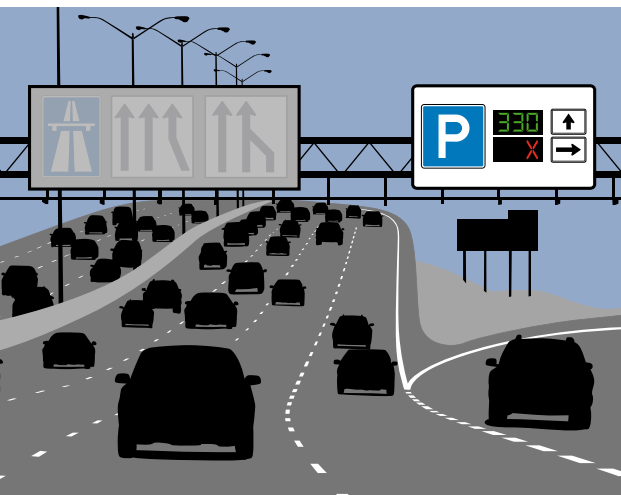

MSR-Traffic solutions for urban areas

MSR-Traffic dynamic LED displays complete the company's product portfolio and offer project developers the possibility to get all the necessary systems from one provider.

Numbers, arrows and symbols can be configured individually.

Many advantages make the system attractive:

- long lifetime
- modern design
- no additional maintenance costs
- weather-proof
- customer-specific configuration
- good legibility

Perfect Solutions in Traffic Systems

MSR-Traffic offers sensor technology and systems that enable the counting as well as the single space detection of vehicles for indoor and outdoor areas.

We will be glad to advise you on the planning and technical realisation of your project.
